Vulcanizing Cement	Page: 1 of 10
	Revision: January/2005

1. Company and product identification	
■ <i>Product name:</i>	Vulcanizing Cement
■ <i>Product identification internal code:</i>	470020, 470021-BV-01, 470022-BV-02, 470023-BV-03, CV M 470051, CV-00 470010, 470040 CV 00A, 470011 CV 01, 470041 CV-01 A, 470012 CV-02, 470042 CV-02 A, 470056 CVM A, 471112 CVU 1000 TORTUGA, 471110 CVU 225 TORTUGA, 471111 CVU 500 TORTUGA, 470071 SBCV1, 470072 SBCV2, 470073 SBCV3
■ <i>Company name:</i>	BORRACHAS VIPAL S/A
■ <i>Address:</i>	Rua Buarque de Macedo, 365 95320-000 Nova Prata - RS - Brazil
■ <i>CNPJ (Legal Entity National Register)</i>	87870952/0001-44
■ <i>Company's phone number:</i>	(54) 242-1666
■ <i>Emergency number:</i>	(54) 242-1666
■ <i>Fax:</i>	(54) 242-1736
■ <i>E-mail:</i>	vipal@vipal.com.br

2. Composition and ingredients information				
■ <i>Preparation:</i>	Adhesive based on aliphatic/naftenic and ketone solvents, natural rubber and additives for rubber.			
■ <i>Chemical nature:</i>	Hydrocarbons and Ketones.			
■ <i>Ingredients and impurities contributing for danger:</i>				
<i>Chemical or generic name</i>	<i>Concentration or concentration range</i>	<i>Classification and danger labeling</i>		
Aliphatic hydrocarbons	≅ 25% (p/p)	Flammable liquid - 3		
Naftenic hydrocarbons	≅ 24% (p/p)	Flammable liquid - 3		
Aromatic hydrocarbons	< 1% (p/p)	Flammable liquid – 3 Toxic substance – 6.1		
Methyl Ethyl Ketone	≅ 50 % (p/p)	Flammable liquid - 3		
○ International Identification				
Substance	EINECS Nº	Risk Phrases	Safety Phrases	Indication(s) of Danger and Symbol(s)

Chemical Products Safety Information Sheet FISPQ

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 2 of 10
	Revision: January/2005

<p>Risk Phrases</p> <p>R11: Highly flammable; R36: Irritating to the eyes; R38: Irritating to the skin; R45: May cause cancer; R46: May cause heritable genetic damage; R62: Possible risk of impaired fertility; R65: Harmful may cause lung damage if swallowed R66: Repeated exposure may cause skin dryness or crackin; R67: Vapors can cause giddiness and drowsiness. R36/38: Irritating to eyes and skin; R48/20: Harmful: danger of serious damage by prolonged exposure through inhalation; R51/53: Toxic to aquatic organisms and may cause long-term adverse effects in the aquatic environment; R50/53: Very toxic to aquatic organisms and may cause long-term adverse effects in the aquatic environment R48/23/24/25: Toxic: danger of serious damage to health by prolonged exposure through inhalation, in contact with skin and if swallowed.</p>	<p>Safety Phrases</p> <p>S2: Keep out of reach of children; S9: Keep container in a well ventilated place; S16: Keep away from sources of ignition – No smoking; S29: Do not empty into drains; S33: Take precautionary measures against static discharges; S45: In case of accident or if you feel inwell seek medical advice immediately (show lable where possible); S53: Avoid exposure. obtain special medical instruction before use; S60: This material and/or it's container must be disposed of as hazardous waste; S61: Avoid release to the environment. Refer to special instructions/Safety data sheet; S62: If swallowed, do not induce vomiting seek medical advice immediately and show this container or label; S36/37: Wear suitable protective clothig and gloves.</p>
T – Toxic F – Flammable Xn – Harmful N – Dangerous for the environment Xi – Irritant	

3. Danger identification	
■ Major dangers:	Liquid and its vapors are flammable. Harmful.
■ Product effects:	
◇ Adverse effects to human health:	Vapors that are inhaled are irritating and CNS-depressant.
◇ Effects on environment:	Product's air-borne vapors make the environment explosive and toxic. The product and water resulting from fire fighting are harmful to flora and fauna. Part of the product spilled in the water will evaporate. The product spilled on the soil may partly evaporate and partly be lixiviated and percolate, contaminating the water table, which therefore limits its use. Biodegradation speed will depend on weather conditions, dilution, and existing microorganisms.
◇ Physical and chemical dangers:	Liquid and its vapors are very flammable upon sparks or flames.
◇ Specific dangers:	Harmful, flammable product.
■ Major symptoms:	Resulting from inhalation: Nausea, headaches, dizziness, vertigo, unconsciousness to coma and death upon severer exposures. Resulting from skin contact: Dryness, irritations and dermatitis
■ Chemical product classification:	Flammable liquid.
■ Emergency overview:	Upon leakage: Avoid all sources of ignition; immediately isolate the area. Upon fire: Use sprinklers with dry chemical powder, chemical foam or CO ₂ .

4. First-aid measures	
■ First-aid measures:	
◇ Inhalation:	Remove victims to fresh air and keep them quiet and warm. Perform artificial respiration, when necessary. Refer them to a physician.
◇ Skin contact:	Take off contaminated clothes. Do not rub the affected parts . Wash with abundant water and soap. Refer them to a physician.
◇ Eye contact:	Wash with abundant water. Refer them to a physician.
◇ Ingestion:	If victims are conscious, make them drink water. Refer them to a physician.
■ Actions that should be avoided:	Wash skin using solvent. Provoke vomit, unless it has been recently ingested in great volume and the patient is not in coma.
■ Short description of major symptoms and effects:	Airway, skin, eye and mucosa irritation and discomfort due to smell.
■ First-aid provider protection and/or notes for physicians:	First-aid providers should use all the individual-protection equipment that is recommended in this sheet, according to the existing scenario. Central Nervous System (CNS) depressor

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 3 of 10
	Revision: January/2005

5. Fire-fighting measures	
■ <i>Appropriate extinction means:</i>	Use chemical-powder (PQS), chemical-foam, or CO2 sprinkles. Use water-mist spout to cool down adjacencies.
■ <i>Inappropriate appropriate extinction means:</i>	Water on flames.
■ <i>Specific dangers:</i>	Water on flames may enhance fire intensity, as well as vapors may be displaced and reach an ignition source, which would cause flames to retrocede.
■ <i>Special methods:</i>	Removal of containers from the area on fire, if this is possible without any risks.
■ <i>Fire-fighters protection:</i>	Use autonomic mask to enter in closed environment.

6. Control measures for spilling or leakage	
■ <i>Personal precautions:</i>	
◇ <i>Removal of ignition sources:</i>	Eliminate all ignition sources, prevent from sparks and flames, and do not smoke in the risk area. Isolate all leakages of ignition sources.
◇ <i>Dust control:</i>	Not applicable, because it is liquid.
◇ <i>Inhalation and mucosa-, eyes- and skin-contact prevention :</i>	Use impermeable boots, clothes and gloves; airtight goggles for chemical products and adequate respiratory protection.
■ <i>Precautions regarding the environment:</i>	
◇ <i>Alarm system:</i>	Surround the area with restraint barriers or trenches. Hinder the leakage, if this is possible without any risks. Do not put the spilled material on the way of any public drainage systems. Absorb using earth, or any other absorbent material. Prevent from contaminating water streams and springs. Water entrainment should take into account posterior treatment of the contaminated water. Avoid performing this entrainment.
■ <i>Cleaning methods:</i>	
◇ <i>Recovery:</i>	Collect the product in a duly identified, well-sealed emergency container. Keep recovered product for posterior disposal.
◇ <i>Neutralization:</i>	Not necessary; this product has pH almost neutral.
◇ <i>Disposal:</i>	Do not dispose of it in regular garbage cans. Do not dispose of it in sewage systems or water streams. Confine, when possible, for posterior recovery or disposal. Final disposal shall be accompanied by an expert, and pursuant to the environmental legislation in force in the community.
◇ <i>Secondary danger prevention</i>	Inappropriate disposal may affect soil, and by percolation, degrade water quality in the water table.

7. Handling and storage	
■ <i>Handling:</i>	
◇ <i>Technical measures:</i>	
- <i>Workers' exposure prevention:</i>	Keep the work setting ventilated to avoid higher vapor concentration than that tolerable. Provide workers with skin and eye protection to prevent from direct contact with the product.
- <i>Fire and explosion prevention:</i>	Keep the work setting ventilated to keep vapor concentration out of explosiveness limits. Use anti-sparking tools and cover system's conducting elements that are in contact with the product with earth to avoid ignition.
- <i>Precautions for safe handling:</i>	Keep the work setting ventilated to prevent from vapor formation higher than tolerated and to avoid contamination due to contact with other products.
◇ <i>Instructions for safe handling:</i>	Provide local exhausting ventilation, whenever the processes require it. Avoid high room temperatures. Avoid contact with other products.
■ <i>Storage:</i>	
◇ <i>Appropriate technical measures:</i>	Keep the product in the original container.

	Revision: January/2005

8. Individual exposure and protection control

■ *Engineering control measures:* **Keep the work setting ventilated to keep vapor concentration limits under the warned tolerance limits. At open settings, when handling with it, position yourself in front of the wind to avoid inhalation.**

■ *Specific control parameters:*

↳ *Limits for occupational exposure:*

Ingredient	# CAS	NR - 15				ACGIH				
		TL-MP		VM		TLV – TWA (8-hour exposure)		TLV - STEL		
		ppm	mg/m ³	ppm	mg/m ³	ppm	mg/m ³	ppm	mg/m ³	exposure period
Hexane	110-54-3	N.F.	N.F.	N.F.	N.F.	500	1.800	1.500	5.400	30 min
Cyclohexane	110-82-7	235	820	293	1.025	300	1.050	900	3.150	30 min
Ethylmethyl ketone	78-93-3	155	460	194	575	200	590	300	885	15 min
Heptane	142-82-5	400	1.640	500	1.804	400	1.600	500	2.000	15 min
Benzene	71-43-2	1 ¹	3,19 ¹	N.F.	N.F.	10	32	50	160	10 min

CAS = Chemical Abstracts Service

NR 15 = Regulating rule for unhealthy activities and operations

ACGIH = American Conference of Governmental and Industrial Hygienists

TL – MP = Tolerance limit – weighted average

TLV – TWA = Threshold Limit Value – Time Weighted Average

TLV – STEL = Threshold Limit Value – Short Term Exposure Limit

N.F. = Not found

¹ = VRT-MPT, air-borne benzene concentration weighted average for an 8-hour period of daily work (NR-15 Annex 13-A, item 6.2)

Biologic indicators:

Ingredient	Toxicologic data			
	Oral DL ₅₀ (mg/kg)	Dermal DL ₅₀	Inhalative CL ₅₀	IDHL
Hexane	28.710, mice	N.F.	5,000ppm, 10min, human CNS	5,000ppm
Cyclohexane	N.F.	N.F.	N.F.	1,300ppm
Ethylmethylketone	2,400mg/kg, mice	6,480mg/kg, mice	40g/m ³ , 2h, mice	3,000ppm
Heptane	N.F.	N.F.	N.F.	750ppm
Benzene	930-female rat 50-man	N.F.	9980ppm, mouse	3,000mg/m ³

IDHL = Immediately Dangerous to Life or Health

DL₅₀ = The dose of a chemical substance that kills 50% of a group of animals from the same species when administered through the same via (oral or dermal) (DL = Lethal Dose)

CL₅₀ = Lethal atmospheric concentration of a chemical substance that kills 50% of a group of exposed animals within a given period of time (CL = Lethal Concentration)

CNS = Central Nervous System

N.F. = Not found

↳ *Other limits and values:*

**Hexane: TLV-TWA for skin 50ppm
Benzene: TLV-TWA for skin 0.5ppm**

Chemical Products Safety Information Sheet FISPQ

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 6 of 10
	Revision: January/2005

<p>■ <i>Recommended monitoring procedures:</i></p>				
<i>Ingredient</i>	<i>Tolerance limit</i>		<i>Methods to assess contamination</i>	
	<i>no air</i>	<i>IBMP</i>	<i>no air</i>	<i>biologic</i>
Hexane	500ppm	5mg/g creat.	Monitor 3500 or 3520 by 3M; Colorimetric Detector Tube MSA/Auer 215409	Urinary dosage of 2,5- hexanedione
Cyclohexane	235ppm	N.F.		
Heptane	400ppm	N.F.		
Ethylmethylketone	155ppm	2mg/l – NR-7	Monitor 3500 or 3520 by 3M; Colorimetric Detector Tube MSA/Auer 215572	MEC Dosage in urine
Benzene	1ppm	N.F.	Monitor 3500 or 3520 by 3M; Colorimetric Detector Tube MSA/Auer 215200 and 215496	Exhaled benzene Phenyl mercapturic acid Trans-transmuconic acid Benzene in urine Reticulocytes Platelet count
<p><i>IBMP = maximum biologic rate permitted (NR-7 MTb)</i> <i>N.F. = Not found</i></p>				
<p>■ <i>Appropriate individual protection equipment:</i></p>				
⇨ <i>Respiratory protection:</i>	Ventilation to keep exposure below TL (tolerance limit). Respirator with chemical filter for organic vapors under high concentrations, and respirator with filtrating semi facial part under concentrations up to TL . In cases of very high-proportion damages in confined settings without ventilation, autonomic respiration equipment or sent-air set.			
⇨ <i>Hands protection:</i>	Gloves for organic solvents whenever there is risk of direct contact with the product.			
⇨ <i>Eyes protection:</i>	Goggles or facial protection whenever there is the risk of sprinkles.			
⇨ <i>Skin and body protection:</i>	Impermeable apron or overall whenever there is direct contact with the product.			
■ <i>Special precautions:</i>	Avoid massive exposure to vapors. Chemical products should be handled with by qualified, skilled people. In places where chemical products are manipulated, workers' exposure should be monitored, as described in the ERPP (Environmental Risk Prevention Program).			
■ <i>Hygiene-related measures:</i>	Clothes, gloves, shoes, IPE(Individual Protection Equipment) should be cleaned efore being used again. Always use for personal hygiene: water, soap and cleansing creams. Wash hands before using the bathroom, eating or drinking. Do not eat where you work <u>Do not use gasoline, diesel oil...</u> or any other petroleum-derived solvent for personal hygiene. Good operational and industrial hygiene procedures help reduce risks at handling with chemical products.			

9. Physicochemical properties	
■ <i>physical state:</i>	Liquid
■ <i>Form:</i>	viscous
■ <i>Color:</i>	Milky Beige
■ <i>Smell:</i>	of ketone
■ <i>pH:</i>	Not significant
<p>■ <i>Specific temperatures or temperature ranges at which changes in the physical state occur:</i></p>	
⇨ <i>Distillation range:</i>	60°C to 84°C (at 760 mmHg)
■ <i>Decomposition temperature:</i>	> 200°C
■ <i>Point of glow:</i>	- 18°C
■ <i>Explosiveness limits superior - inferior:</i>	11.5 – 1.2%
■ <i>Vapor pressure:</i>	0.42kgf/cm² at 37.8°C

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 7 of 10
	Revision: January/2005

■ <i>Vapor density:</i>	2.9 (air = 1)
■ <i>Density:</i>	0.71 to 0.76 (water = 1)
■ <i>Solubility (indicate solvent(s)):</i>	Soluble in organic solvents
■ <i>Evaporation rate:</i>	600 (butyl acetate = 100)
■ <i>Viscosity:</i>	1700 — 3000 cP

10. Stability and reactivity	
■ <i>Specific conditions:</i>	
◇ <i>Instability:</i>	Stable product under normal conditions of use. Avoid contact with strong oxidizing chemical products. Storage temperatures higher than 40°C are harmful to the product.
◇ <i>Dangerous reactions:</i>	Reaction with strong oxidizing chemical products (chlorates, peroxides, acids and others). Self-ignition over 280°C
■ <i>Conditions to be avoided:</i>	Heat and ignition sources.
■ <i>Incompatible materials or substances:</i>	Strong oxidizing agents such as peroxides, liquid chlorine and concentrated oxygen
■ <i>Need for adding additives and inhibitors:</i>	Stable, therefore it does not need additives and inhibitors.
■ <i>Dangerous products from decomposition:</i>	By combustion: carbon dioxide CO₂, carbon monoxide CO, and toxic gases.

11. Toxicologic information	
■ <i>Information according to the different exposure manners:</i>	
◇ <i>Acute toxicity:</i>	<u>Inhalation:</u> When inhaled, vapors are CNS-irritating and -depressant, and their effects range from headache, vertigo, nausea, dizziness, confusion and lack of coordination, unconsciousness, and lung edema to coma and death at severe exposures. <u>Skin contact:</u> Skin contact causes dryness, and may cause irritation and dermatitis. <u>Eye contact:</u> vapors cause eye irritation. <u>Ingestion:</u> At vomiting, the major risks are chemical pneumonitis, lung edema and hemorrhage resulting from the aspiration through airway.
◇ <i>Local effects:</i>	<u>Inhalation:</u> it may cause superior airway irritation with wet cough (mucous secretion). <u>Skin contact:</u> irritation and dryness. <u>Eye contact:</u> irritation with tearing and congestion. <u>Ingestion:</u> it may cause severe gastric lesions.
◇ <i>Sensitization:</i>	In individuals with allergic rhinitis it makes nasal mucosa sensitive.
◇ <i>Chronic toxicity:</i>	<u>Inhalation:</u> it may cause headache, vertigo, nausea, dizziness etc. <u>Skin contact:</u> it may produce dryness dermatitis. <u>Eye contact:</u> vapors may produce conjunctivitis.
◇ <i>Toxicologically synergic effects:</i>	Unknown.
◇ <i>Specific effects:</i>	Non-carcinogenic, non-mutagenic, non-teratogenic, non-embryotoxic product.
■ <i>Substances causing effects:</i>	
◇ <i>Additives:</i>	Unknown.
◇ <i>Potential:</i>	Unknown.

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 8 of 10
	Revision: January/2005

12. Ecologic information	
■ <i>Effects on environment, behavior, and product impact:</i>	
◇ <i>Mobility:</i>	<u>In water medium:</u> immiscible, it floats in the form of pellicle, solvents evaporate over time; inert, solid residues also float, and may be collected. <u>In soil medium:</u> solvents percolate and may reach water tables; inert, solid residues remain on the surface and may be collected. <u>In atmosphere medium:</u> solvents evaporate.
◇ <i>Persistence/degradability:</i>	Water solvents will go to the atmosphere, where they dissipate. Percolated solvents in the soil, as petroleum fraction, will remain unaltered for undetermined time.
◇ <i>Bioaccumulation:</i>	It does not bioaccumulate
◇ <i>Expected behavior:</i>	Spilled or applied, solvents will tend to evaporate, and will dissipate in the atmosphere, preferably near the soil, due to its density, which is higher than that of the air. It will be left, for the environment, the solid part of the adhesive - with inert effect.
◇ <i>Impact on environment:</i>	If the product is spilled in the water, it will float, and its solvents will damage water life until they evaporate. Its solvents, once they are distributed on the soil by percolation, may damage flora, fauna and water tables. In the atmosphere, solvent vapors may contribute for the greenhouse effect.
◇ <i>Ecotoxicity:</i>	<u>Air:</u> solvent vapors are harmful for the environment. <u>Water:</u> may provide water with unwanted qualities, thus impairing its use. <ul style="list-style-type: none"> • Benzene: as a less probable component of this product, its maximum limit for waters Class 1, 2 and 3 established at 0,01 mg/l; • floating materials: established as being virtually absent in waters Class 1, 2, 3, 4, 5, 6, 7 and 8; • oils and Greases: established as being virtually absent in waters Class 1, 2, 3, 5 and 7, and iridescences are tolerated for waters Class 4, 6 and 8; for special class water, there is no tolerance for any kind of contaminating agents. Source: Resolution CONAMA # 20, dated from June 18, 1986. <u>Soil:</u> Its solvents may affect the soil, and, by percolation, contaminate waters in the water table.

13. Considerations on treatment and disposal	
■ <i>Treatment and disposal methods:</i>	
◇ <i>Product:</i>	Product that is not used for its adhesive function, should be leaked from the container, and its solvents should be evaporated in ventilated setting. Solid residues should be kept in a covered place, in sealed containers, in good conditions, identified, and referred to treatment in a site duly licensed by the competent environmental agency.
◇ <i>Product remainders:</i>	Product's remainders should be kept in a covered place, in sealed containers, in good conditions, identified, and referred to treatment in a site duly licensed by the competent environmental agency.
◇ <i>Utilized package:</i>	Do not reuse containers. Empty packages should be kept in a covered place, in sealed containers, in good conditions, identified and referred to treatment in a site duly licensed by the competent environmental agency.

Precaution measures and specific conditions for transportation

⇨ *Land, River and Sea transport:*

Smoking is forbidden near packages during handling. Using gas lighting near packages is forbidden. In addition, devices and equipment capable of provoking ignition of products or their gases or vapors should not be used.

For quantities above 333 kg of this product, transported in a vehicle, it is mandatory: flammable risk label (lozenge - figure below) and safety sign (rectangle - figure below) externally fixed on the vehicle; IPE and equipment for emergencies; trained driver; product's emergency sheet; license given by the competent environmental agency for the transportation of dangerous products. It is prohibited to carry passengers in the vehicle without having the respective IPE kits [Individual Protection Equipment]).

■ *Additional regulations:*

<i>Product name</i>	FISPQ #: 0003
Vulcanizing Cement	Page: 10 of 10
	Revision: January/2005

15. Regulations	
■ <i>Regulations:</i>	
⇨ <i>Information about risks and safety, as described in the label:</i>	1 - Use it with appropriate ventilation and get protected by using a mask with organic vapor filter. 2 - Avoid repeated, prolonged contact with skin. Use impermeable gloves. 3 - This product should not be ingested; if this occurs, do not provoke vomiting. If the person is conscious, administer water or milk. Refer to specialized medical assistance and show the package. 4 - Use goggles to protect from sprinkles 5 - Keep it away from children and animals. 6 - Flammable product; always keep it well-sealed and away from heat sources. 7 - Package should not be incinerated, reused, or perforated. STORAGE: In ventilated, dry places, away from heat or ignition (sparks) sources.

16. Additional information	
■ <i>Examples:</i>	
⇨ <i>Special needs for training:</i>	The user should be warned to keep the place of utilization well ventilated.
⇨ <i>Recommended use and potential restrictions to the chemical product:</i>	Recommended for gluing and vulcanizing tire and bicycle's tube repairs.
⇨ <i>References:</i>	<ul style="list-style-type: none"> • Manual de Autoproteção para Manuseio e Transporte Rodoviário de Produtos Perigosos [Self-Protection Manual for Handling and Road Transport of Dangerous Products] – July/1997 – Mercosul Edition; • International Maritime Dangerous Goods Code – IMO - 2002 Edition; • Dangerous Goods Regulations - IATA – 44th Edition - 2003; • Toxicity and Safe Handling of Rubber Chemicals Fourth Edition, 1999, RAPRA Technology Ltda; • Toxicologia Industrial [Industrial Toxicology], 1997, Roberto Charles Góes; • Occupational Medicine and Health Guidelines - Collected Writings, 40th Edition, 1998; • Internet: http://www.osha.gov ; http://www.acgih.org/home.htm ; http://www.chemfinder.com ; http://www.cas.org ; http://ntp-server.niehs.nih.gov/cgi/iH_Indexes/All/iH_All_Frames.html ; http://ptcl.chem.ox.ac.uk/MSDS/mels.html ; http://www.osha-slc.gov/dts/Chemicalsampling/toc/toc_Chemsamp.html ; http://www.atsdr.cdc.gov/toxprofiles/tp3.html; http://www.nfpa.org. www.uvigo.es/servicios/prevencion/Etiquetaxe%20substancias.ppt http://ecb.jrc.it/esis/esis.php?PGM=ein&DEPUIIS=autre • NBR 14725 – Chemical product safety information sheet - FISPQ, July 2001, ABNT: Associação Brasileira de Normas Técnicas [Brazilian Association of Technical Rules];

Information and recommendations contained in this publication were collected from apt sources. Data contained in this information sheet refer to a specific product.

Borrachas Vipal S.A. , through this information sheet, does not intend to give absolute, definitive information about this product and its risks; rather, it intends to provide subsidies, by giving known information, to its employees and clients for their individual protection, the maintenance of occupational continuity, and environment preservation.
